## "BOILER INSPECTION ACT."

May 19th, 1931.

PURSUANT to the provisions of section 60 of the "Boiler Inspection Act," being chapter 6 of the Statutes of British Columbia, 1931, His Honour the Administrator in Council, by Order in Council No. 644, approved on the 19th day of May, 1931, has been pleased to adopt and make regulations under the said Act, the regulations and provisions known as the "Canadian Interprovincial Regulations for the Construction and Inspection of Boilers and Machinery," and published by the King's Printer of the Province of Saskatchewan in the years 1929 and 1930, with the exception of sections 1, 2, 3, and 351 of the said regulations, and with the exceptions and variations following, namely:—

Section 197 of the said regulations be amended by adding the following thereto, after paragraph R.:—

"S. 0.50.—To be added if the boiler has not been open to inspection during the whole period of construction.

"T. 1.00.—When the longitudinal seam is parallel to the direction of rolling of the plate at the mill. Or 'special plates,' which must be stamped by the makers of plates with the tensile strength taken at right angles to the direction of rolling, may be allowed by consent of the Chief Inspector, with less than the addition of 1.

"U.—Second-hand boilers, over 36 inches in diameter, having the longitudinal seam of lap-riveted construction, that have not been registered in British Columbia previous to the adoption of these regulations shall have an addition of 4 added to the factor of safety."

Section 213 of the said regulations be amended by adding the following thereto:—

"C.—180 for end of curvature of flanged head for plates  $\frac{7}{16}$  inch thick and under.

"C.—200 for end of curvature of flanged head for plates over  $\frac{7}{16}$  inch thick.

"For flat surfaces below the tubes in H.R.T. boilers  $(t+1)^2$  may be substituted for  $t^2$  in the formula.

"C.—125  $\times (t+1)^2$  for surfaces other than steam-pressure."

Section 218 of the said regulations be amended by adding the following thereto:—

"When a dished head has a manhole opening, the thickness as found by these regulations shall be increased by not less than  $\frac{1}{8}$  inch over that called for by the formula. Where a dished head has a flanged opening supported by an attached flue, the increase of  $\frac{1}{8}$  inch in thickness is not required. If more than one manhole opening is inserted, the minimum distance between the openings shall be not less than one-fourth of the outside diameter of the head."

Section 240 of the said regulations be amended by adding the following thereto:—

"For vertical-tube boilers the length of the water-leg must not exceed twenty-four times the width of the top of the water-space."

Section 264 of the said regulations be amended by adding the following thereto:—

"Each valve shall be provided with a ring under the head of the compression-screw to prevent a greater pressure being put on the boiler than that allowed by the certificate of inspection."

Section 291 of the said regulations be amended by adding the following thereto:—

"When a blow-off cock or valve is in a pit or any confined space, an extension lever shall be used for opening and closing the cock or valve. The open and closed position of valve must be clearly marked on extension.

"Where boilers are in batteries, for purposes of blowing down, they shall be numbered both back and front. On large boilers with brick settings, two valves on blow-off pipe are recommended."

Section 292 of the said regulations be amended by adding the following thereto:—

"All horizontal cylindrical externally fired boilers shall have approved steel suspensions.

"Exception to the above rule may be allowed by the Chief Inspector on the recommendation of an Inspector, who shall give his reasons in writing why the exception should be made."

The following regulation be added as section 303A:—

"Gunn-shot feeds must be equipped with quick-action shut-off valves within easy reach of the sawyer."

Section 353 of the said regulations be amended by adding the following thereto:—

"The working-pressure on the ends of stay-bolts attached to plate by autogenous welding will be calculated by the following formula:—

$$Wp = \frac{C \times D (t-1)}{A}$$

"Where—

Wp = allowable working-pressure.

C = 1550.

T = thickness of plate in sixteenths of an inch.

D = diameter of stay-bolt in inches.

A = area supported."

Section 355 be amended by striking out in the second line thereof the words—"Except those exempted by the preceding section."

His Honour the Administrator in Council by the said Order in Council has further been pleased to rescind all regulations heretofore made, pursuant to the said Act or the Act for which the said Act is substituted, except the regulations relating to the examination of engineers.
